

Tee Hinge:

1. Place hinges in desired position on gate ensuring strap is horizontal. Fix with screws provided.
2. Position gate in opening and support allowing correct clearances between gate and post.
3. Fasten hinge to post/frame with screws provided.
4. May grease for smooth operation.

Directions are for guidance only. Requirements may vary due to individual circumstances. We recommend drilling smaller pilot holes before screwing to reduce the chance of splitting wood, and when going completely through wood products, drill from both sides.
